

## Middle School Grades 5-8

Durham Nativity School provides life-changing opportunities in support of middle school boys and their families who appreciate the value of a quality education and recognize education as their pathway to success, but do not have the economic means to consider a private school education.

We focus on the development of the whole child

with emphasis on academics, character, community service, the arts, sports and music.

 during their four years with us, we address their individual needs and work to maximize their potential, bringing them up to grade level and beyond.

## High School

Approximately 93% of private high school graduates attend college.

# 93%

We recognize the impact that a private college preparatory high school education can have on our graduates.

We assist our graduates with:

-  Identifying and applying to private high schools that best fit the student.
-  Monitoring academic progress. If support is needed, we arrange for tutoring.
-  Tuition assistance if it is not fully covered by the school and the student's family.
-  Help adjusting to life at a private high school, moral support, and finding summer internships.

## College Years and beyond

Our dedicated staff supports our graduates as they traverse the college admissions process; the support continues throughout college and post-college.

We offer career coaching for our graduates. Friends of our school have been very helpful in assisting our graduates secure jobs and internships.

We encourage our students to return to Durham to give back and impact the community
